3. Document Overview

This Business Requirements Document (BRD) defines the functional and non-functional requirements for the I-Property system. This is a centralized web-based platform for managing all activities related to rental properties, landlord agreements, payment processing, and related tax obligations for J-Vo's Property Management Division.

The I-Property system is intended to replace manual, paper-based processes with a structured digital workflow that enforces the organization's approval matrix, maintains a complete audit trail, generates automated reports, and integrates with Oracle Financial for payment execution.

4. Purpose and Scope

4.1 Purpose

To develop and deploy a system that digitizes, automates, and governs all end-to-end rental property management processes including request initiation, multi-level approval workflows, agreement lifecycle management, utility and signage payment tracking, and financial reporting.

4.2 In Scope — Phase 1

- New rental request initiation and approval workflow
- Landlord and property profiling
- Contract creation, renewal, and vacated/termination processing
- Multi-level approval matrix enforcement (Area Officer > ABH > Director > Admin HO > Finance)
- Rental payment management and automated payment request generation
- Utility bills payment module (Electricity, Gas, Water — consumer/meter number, units billed, advance tax)
- Accrual expense reports (type-wise and area-wise) for monthly ledger recording
- Monthly advance settlement reports (type-wise and area-wise)
- Tax calculations including Sales Tax
- Commercial value and historic value updates
- Agreement expiry notification and configurable look-ahead alerts
- Comparison reports (landlord-wise and area-wise)
- Future rental forecast reports
- Soft copy document management for all process documents
- Role-based access control and full audit trail

4.3 In Scope — Phase 2

- Bank payment cheque cancellation processing
- Integration with Capex system
- Signage details entry and signage payment history

4.4 Out of Scope

- Actual payment disbursement processing (handled entirely within Oracle Financial)
- Payroll or HR systems integration
- Physical property maintenance management
- Mobile application development

5. Stakeholders

Name and email fields to be completed by the Project Manager before document circulation. All stakeholders listed below have been identified as either sponsors, decision-makers, or subject matter experts for this initiative.

Name	Department	Role	Email
TBD	Finance	Sponsor (CFO)	cfo@organization.com
TBD	Admin	Business Lead	admin.lead@organization.com
TBD	Admin	Stakeholder	admin@organization.com
TBD	Finance	Stakeholder	finance@organization.com
TBD	IT	Stakeholder	it@organization.com
TBD	IT - PMO	PMO Lead	pmo.lead@organization.com
TBD	IT - PMO	Project Manager	pm@organization.com

6. Assumptions

- Oracle Financial (OF) will be the system of record for all payment disbursements and ledger entries. I-Property will generate and forward payment requests to OF; it will not execute payments directly.
- Rental and tax calculation procedures defined in the current policy/criteria document will be implemented as-is. Any future policy changes will be handled as change requests.
- Original physical copies of all uploaded documents will be retained and archived at J-Vo Head Office.
- Module-generated reports will be used as the basis for recording expenses in Oracle Financial.
- All users will have network access to the system during business hours.
- The organization will provide an SMTP server for email notifications.
- The business team will provide finalized notification event templates and report formats before the UAT phase.
- Browser compatibility requirements apply to desktop environments. Mobile browser support is best-effort for Phase 1.

7. Constraints

- Processing turnaround time prior to Admin-level approval is subject to escalation policies defined by business. The system will enforce configurable SLA timers for each approval stage.
- Any additional state mandated changes to tax regulations will require a system change request and cannot be self-configured by end users.
- Oracle Financial integration is dependent on the availability of OF APIs or batch interfaces. Integration design is subject to the OF technical team's specifications.
- Phase 2 features (signage, Capex integration, cheque cancellation) are out of scope for the initial delivery and will be scoped separately.

8. Roles and Permissions

The following table defines the system roles and the access permissions associated with each role. Role assignment is managed by the System Administrator.

Role	Permissions
Area Officer	Initiate new requests; submit renewal and vacated requests; enter utility bill data; view own requests.
Area Admin	All Area Officer permissions; print agreements; initiate vacated process; view area-level reports.
ABH / MR / ARH	Approve or reject requests forwarded by Area Officer; approve monthly payment summaries; stop specific landlord payments with remarks; view regional reports.
Director Office	Approve or reject requests forwarded by ABH; escalate to Admin Head Office upon approval.
Admin Head Office	Review approved requests; input/edit property details; mark requests as Completed; issue vacated notices; upload scanned documents.
Finance Department	Receive payment notifications; view comprehensive payment reports; process payments via Oracle Financial; stop payments per instructions.
System Administrator	User account management; role assignment; system configuration; audit log access.

9. Functional Requirements

Each functional requirement is defined with a unique FR-ID, a description, measurable acceptance criteria, and a priority classification (Must Have / Should Have / Phase 2).

9.1 New Request

FR-ID	Requirement	Acceptance Criteria	Priority
FR-NR-01	Area Officer initiates a new request in the system. A unique reference ID is auto-generated upon submission.	Reference ID appears on screen and in confirmation email within 5 seconds of submission.	Must Have
FR-NR-02	The system sends an email notification to ABH upon new request creation, prompting approval action.	Email received within 2 minutes containing request reference ID, summary, and direct approval link.	Must Have
FR-NR-03	ABH approves or rejects the request. Rejected requests must include mandatory remarks.	Rejection without remarks is blocked by validation. Remarks field max 500 characters. Status updated to 'Rejected' immediately.	Must Have
FR-NR-04	Approved requests from ABH are forwarded to the Director Office with a notification.	The Director Office receives email with request details within 2 minutes of ABH approval.	Must Have

FR-NR-05	The Director Office approves or rejects the request. Approval triggers notification to the Admin Head Office.	Admin Head Office email received within 2 minutes of Director approval. Request status updated to 'Pending Admin Review'.	Must Have
FR-NR-06	Admin Head Office reviews documents, inputs required details, and marks status as 'Completed'.	Status change to 'Completed' triggers automatic notification to Area Admin and Finance Dept. simultaneously.	Must Have
FR-NR-07	Finance Dept. receives notification upon agreement completion to initiate payment processing.	Finance notification contains agreement ID, landlord ID, payment amount, and effective date.	Must Have
FR-NR-08	A full approval summary (names, roles, dates) is auto-generated and available for printing with agreement documents.	Summary PDF generated within 10 seconds of final approval. Includes all approvers with date/time stamps.	Must Have
FR-NR-09	Monthly payment summary is generated at month-end, requiring approval from ABH/GM. Option to stop payment for specific landlord with mandatory remarks.	Stop payment action requires remarks (min 10 characters). Stopped payments flagged in red in the summary report.	Must Have
FR-NR-10	Finance receives a comprehensive, approved payment report listing all payments to be released for that month.	Report exportable to Excel and PDF. Contains landlord ID, agreement ID, amount, due date, and bank details.	Must Have
FR-NR-11	Notifications are generated for all predefined events (expiry reached, approved, rejected, pending approval, payment due).	All notification templates defined in system configuration. Events list and formats to be finalized by the Business team before UAT.	Must Have
FR-NR-12	All unsaved changes are discarded if the user exits mid-form without saving. A confirmation prompt is displayed.	Browser navigation away from an unsaved form triggers a 'Discard changes?' dialog. No partial data is persisted.	Must Have

9.2 Renewal or Change of Ownership Request

FR-ID	Requirement	Acceptance Criteria	Priority
FR-RN-01	The system provides an Agreement Expiry Report showing agreements nearing expiry. Admin uses this report to initiate renewal.	Report available in the Renewal tab. Configurable look-ahead period (default 90 days). Exportable to Excel/PDF.	Must Have
FR-RN-02	Area Office selects the expiring agreement and initiates a renewal request. ABH/MR/ARH can edit details and add remarks before submitting.	Pre-populated fields from existing agreement. Editable fields clearly highlighted. Remarks field mandatory on submission.	Must Have
FR-RN-03	Renewal request follows the same approval workflow as new requests (ABH -> Director -> Admin HO).	Same FR-NR-03 through FR-NR-07 acceptance criteria	Must Have

		apply. Approval chain visible in request audit trail.	
FR-RN-04	A new unique reference ID is generated for every renewed request.	New reference ID distinct from original. Both original and renewal IDs cross-referenced in the system.	Must Have
FR-RN-05	Approved renewal is forwarded to the Finance Dept. for updated payment processing.	Finance notification includes new lease terms, updated payment amounts, and effective renewal date.	Must Have
FR-RN-06	Rejected renewal requests are marked as 'Closed/Completed'. ABH/MR/ARH and Finance Dept. are notified.	Rejection notification sent within 2 minutes. Request status permanently set to 'Closed'. No further actions possible.	Must Have

9.3 Vacated or Termination of Agreement Request

FR-ID	Requirement	Acceptance Criteria	Priority
FR-VT-01	Area Admin initiates a termination/vacated request. Same approval chain as new request applies.	Vacated request form captures: termination date, reason, and supporting documents. Reference ID auto-generated.	Must Have
FR-VT-02	Upon Director approval, Finance Dept. is immediately and automatically notified to stop rental payments from the specified date.	Finance stop-payment notification generated within 2 minutes of Director approval. Includes agreement ID, landlord ID, and last payment date.	Must Have
FR-VT-03	System automatically ceases generating payment entries and expense accruals from the vacated date.	Automated payment generation halted from the termination date. No manual intervention required.	Must Have
FR-VT-04	Admin Head Office issues a formal vacated notice and uploads the scanned copy to the system.	Uploaded document linked to the vacated request. Upload supports PDF, JPG, PNG formats. Max file size 10 MB.	Must Have

9.4 Utility Bills Payment

FR-ID	Requirement	Acceptance Criteria	Priority
FR-UT-01	Utility bill consumer/meter details are configured during the property profiling phase per agreement.	Each agreement can have multiple utility connections. Consumer number, meter number, and type (Electricity/Gas/Water) stored.	Must Have
FR-UT-02	Area Office user searches utility bill details by Agreement ID or Landlord ID and selects bill type.	Search returns results within 2 seconds. Displays existing utility connections for selection.	Must Have

FR-UT-03	User inputs bill period, units consumed, bill amount, and advance tax, then uploads the bill document.	All fields validated on submission. Bill amount and advance tax accept up to 2 decimal places. File upload max 10 MB.	Must Have
FR-UT-04	Submitted utility bill is routed to ABH for approval. Finance is notified upon ABH approval for payment processing.	ABH receives notification within 2 minutes. Finance notification includes bill ID, amount, and payment due date.	Must Have
FR-UT-05	Utility bill payment report is available, filterable by area, landlord, agreement, bill type, and period.	Report exportable to Excel and PDF. Data available within 24 hours of bill entry.	Must Have

9.5 Signage Payment (Phase 2)

FR-ID	Requirement	Acceptance Criteria	Priority
FR-SG-01	User inputs signage information including Landlord ID, signage size, rate per sq.ft., and agent/collector name.	Multiple signage records supported per landlord. All fields mandatory except collector name.	Phase 2
FR-SG-02	For signage payment, user selects landlord ID, views all associated signage, and selects the relevant record.	All signage records for a landlord displayed in a list view. Selection highlights the record for confirmation.	Phase 2
FR-SG-03	User enters payment period, tax amount, uploads bill, and saves the transaction.	Transaction saved with unique signage payment ID. Validation prevents duplicate payments for the same period.	Phase 2
FR-SG-04	Signage payment report available filterable by landlord, period, and agent.	Report exportable to Excel and PDF.	Phase 2

9.6 Reports

FR-ID	Requirement	Acceptance Criteria	Priority
FR-RP-01	Automated monthly payment report generated at month-end, pending ABH approval with stop-payment capability.	Report auto-generated on the last working day of the month. ABH notified via email. Report locked for editing after approval.	Must Have
FR-RP-02	Monthly expense recording reports (payments and advance settlements) available for Oracle Financial ledger entries, filterable by type and area.	Reports cover accrual and advance settlement entries. Exportable in OF-compatible format.	Must Have
FR-RP-03	Approval reports showing pending and completed approvals available for Admin and ABH.	Filterable by date range, status, and approver. Exportable to Excel and PDF.	Must Have
FR-RP-04	Future forecast and projection reports available for upcoming rental payments and agreement renewals.	Forecast period configurable (3, 6, 12 months). Based on current agreements and	Should Have

		historical rental escalation rates.	
FR-RP-05	Weekly agreement expiry notification report listing agreements expiring within the configurable look-ahead window.	Default look-ahead: 90 days. Report emailed weekly to Admin. Available on-demand via Reports module.	Must Have
FR-RP-06	Utility, signage, and other expense reports accessible by authorized roles.	Access controlled by role. Finance and Admin can view all. Area Officers see only their area.	Must Have
FR-RP-07	Agreement Renewal and Vacated report showing status and history of all such requests.	Filterable by area, date range, and status. Includes original and renewal reference IDs.	Must Have
FR-RP-08	Commercial value history report showing historic and current commercial property values per agreement.	Audit trail of all commercial value updates with date, old value, and new value.	Should Have

10. Non-Functional Requirements

ID	Category	Requirement & Acceptance Criteria	Priority
NFR-01	Performance	The system shall support up to 100 concurrent users without degradation. Average page load time shall not exceed 3 seconds under normal load.	High
NFR-02	Availability	The system shall maintain 99.5% uptime during business hours (08:00-20:00). Recovery Time Objective (RTO) shall be 1 business day after outage.	High
NFR-03	Security - Authentication	All users must authenticate via organization SSO/LDAP. Session timeout after 30 minutes of inactivity. Failed login lockout after 5 attempts.	Critical
NFR-04	Security - Authorization	Role-based access control (RBAC) must be implemented. Each user role shall only access screens and data permitted for that role.	Critical
NFR-05	Data Backup	Full data backup shall be performed daily. Backups shall be retained for a minimum of 90 days. Recovery Point Objective (RPO) shall be 24 hours.	High
NFR-06	Audit Trail	All create, read (sensitive data), update, and delete actions shall be logged with user ID, timestamp, and before/after values. Logs shall be tamper-proof.	High
NFR-07	Browser Compatibility	Application must be compatible with the last three major versions of Chrome, Firefox, and Edge. Internet Explorer 11 support as minimum legacy requirement.	Medium
NFR-08	Data Encryption	All data in transit shall be encrypted via TLS 1.2 or higher. Sensitive fields (e.g., bank details) shall be encrypted at rest using AES-256.	Critical

NFR-09	Scalability	Architecture shall support horizontal scaling to accommodate a 50% increase in user load without code changes.	Medium
NFR-10	Usability	Core workflows (new request, renewal, utility payment) shall be completable in fewer than 10 screen interactions. The system shall display inline validation messages.	Medium

11. Integration Requirements

The following integrations are required for Phase 1. Detailed technical integration specifications (field mappings, API contracts, error handling) are to be documented in a separate Integration Design Document (IDD) by the IT team.

System	Integration Type	Direction	Description
Oracle Financial (OF)	API / Batch File	i-Property → OF	Payment requests, expense booking entries, and advance settlement reports are transmitted to OF for processing. Utility and signage payment data is pushed upon ABH approval.
Oracle Financial (OF)	API	OF → i-Property	Payment confirmation and transaction reference numbers are received back from OF to update request status in i-Property.
Email / Notification Server	SMTP	i-Property → Users	System-generated email notifications for all approval events, expiry reminders, rejections, and payment confirmations.
Document Storage	File System / Object Store	Bidirectional	Scanned agreements, utility bills, and vacated notices are stored and retrieved from a central document repository.

12. Data Requirements

12.1 Data Entities

- Landlord Profile: Landlord ID, Name, State ID No, State ID Issue State, State ID Expiry, contact details, bank account details, Tax ID..
- Property Profile: Property ID, address, area, type, linked Landlord ID, commercial value, utility connections.
- Agreement: Agreement ID, reference ID, Landlord ID, Property ID, start date, end date, rental amount, tax rate, escalation clause, status, document attachments.
- Request: Request ID, type (New/Renewal/Vacated), status, initiator, current approver, approval history, remarks, timestamps.
- Utility Bill: Bill ID, Agreement ID, bill type, period, units consumed, amount, advance tax, uploaded document, payment status.

- Payment Record: Payment ID, Agreement ID, period, amount, tax, net payable, status, OF transaction reference.
- Notification Log: Event ID, event type, triggered by, recipient(s), timestamp, delivery status.

12.2 Data Retention

- All agreement and payment records must be retained for a minimum of 7 years in accordance with financial record-keeping requirements.
- Audit logs must be retained for a minimum of 3 years.
- Archived data must be accessible (read-only) via the system for the retention period.

13. Notification Events

The following events trigger automated system notifications. Notification templates and recipient lists are to be finalized by the Business team and configured in the system before UAT.

Event ID	Event Description	Recipients	Channel
NE-01	New request submitted by Area Officer	ABH	Email
NE-02	Request approved by ABH	Director Office	Email
NE-03	Request rejected by ABH	Area Officer	Email + In-App
NE-04	Request approved by Director Office	Admin Head Office	Email
NE-05	Request rejected by Director Office	ABH, Area Officer	Email + In-App
NE-06	Request marked Completed by Admin HO	Area Admin, Finance Dept.	Email
NE-07	Monthly payment summary ready for approval	ABH/GM	Email
NE-08	Payment summary approved — payments to release	Finance Dept.	Email
NE-09	Agreement expiry within look-ahead window (default 90 days)	Admin, ABH	Email (Weekly)
NE-10	Vacated request approved by Director	Finance Dept.	Email (Urgent)
NE-11	Utility bill submitted and pending ABH approval	ABH	Email
NE-12	Utility bill approved by ABH	Finance Dept.	Email
NE-13	Payment stopped for a landlord	Finance Dept., ABH	Email + In-App
NE-14	Approval SLA breached (pending > configured threshold)	System Admin, Manager	Email + In-App

14. Process Flows

Detailed process flow diagrams (New Request, Renewal, Vacated, Utility Bill) are to be attached as separate appendix exhibits. The narrative flows below describe the as-designed system process.

14.1 New Request Flow

- Step 1: Area Officer submits new request. The system generates reference ID and notifies ABH.
- Step 2: ABH reviews and either approves (forwards to Director) or rejects (remarks mandatory, Area Officer notified).
- Step 3: Director Office reviews and either approves (Admin HO notified) or rejects (ABH and Area Officer notified).
- Step 4: Admin Head Office reviews documents, inputs details, marks as Completed. Area Admin and Finance notified.
- Step 5: Area Admin prints agreement with approval summary. Finance initiates payment in Oracle Financial.
- Step 6: Month-end: System generates payment summary. ABH approves (with stop-payment option). Finance releases payments.

14.2 Renewal Request Flow

- Step 1: Admin generates expiry report. Area Office identifies expiring agreements and initiates renewal.
- Step 2: ABH/MR/ARH edits details, adds remarks, and submits renewal request.
- Step 3: Renewal follows an identical approval chain as New Request (see 14.1, Steps 2-6).
- Step 4: If rejected at any stage: request marked Closed, all relevant parties notified.

14.3 Vacated/Termination Flow

- Step 1: Area Admin initiates vacated request with termination date and supporting documents.
- Step 2: Same approval chain as New Request (ABH > Director > Admin HO).
- Step 3: Upon Director approval: Finance immediately notified to stop payments. System halts automated payment generation from termination date.
- Step 4: Admin Head Office issues formal vacated notice and uploads scanned copy.

15. Acronyms

Acronym	Definition
ABH	Area Business Head
MR	Manager Retail
ARH	Area Regional Head
OF	Oracle Financial
HO	Head Office

IE	Internet Explorer
PMO	Project Management Office
IT	Information Technology
CFO	Chief Finance Officer
BRD	Business Requirements Document
ID	Identifier
NFR	Non-Functional Requirement
SLA	Service Level Agreement
RBAC	Role-Based Access Control

16. Stakeholder Sign-Off

16.1 Prepared By

Name & Role	Department	Signature	Date
Business Analyst, IT-PMO	IT - PMO		
Head of Enterprise Architecture	IT - PMO		

16.2 Approved By

Name & Role	Department	Signature	Date
Manager Real Estate	Admin		
Senior Manager Finance	Finance		
Head Business Systems	IT		
Head of Internal Audit	Audit		
Head of Legal	Legal / Finance		

By signing this document, stakeholders confirm that the requirements described herein accurately represent the business needs and that they approve this document as the baseline for system development.
